

VRIPHYS 2014

Work in Progress Session

In the scope of the VRIPHYS 2014 conference, an oral session with short presentations (typically 15-20 min including questions) will be organized. These presentations should focus on aspects related to Virtual Reality Interaction and Physical Simulation.

Work in progress, unpublished or recent results are particularly well suited for this session. The presented work will not be included in the proceedings, so that participants get feedback on their work without preventing them from submitting their work later. This workshop is therefore well suited for Ph.D. candidates.

To present your work during these sessions, please send us an abstract (2 pages max.) at: [vriphys14\(at\)cs.uni-bremen.de](mailto:vriphys14(at)cs.uni-bremen.de) by the 30th of August 2014.

More information about this „Work in Progress“ session can be found on the conference web site: <http://vriphys2014.uni-bremen.de>.

Best regards, VRIPHYS 2014 organization committee
